

You can feel pain, right?

So can he.

This is Joey. Joey is five months old and still growing inside his mother's womb. There is a growing consensus among scientists that unborn children can feel excruciating pain at 20 weeks -- just five months old -- and earlier.

1.3 million abortions are performed each year in the United States -- thousands of which take the lives of unborn children Joey's age or older.

An overwhelming majority of Americans support a law requiring that a woman who is 20 or more weeks pregnant be informed about the pain abortion will inflict on her unborn child.

For more information about the pain of the unborn and what you can do to help, visit www.nrlc.org/abortion/fetal_pain/index.html.
